

SCM Smart CARD READER Professional

Article number: 775-2027-01

Short product description

Card reader plus software to read SIM card / various other smart cards / Online Banking

Product description

SCM Smart CARD Reader Professional is the ideal solution to edit and manage data saved on different types of smart cards. The software uses one user interface for different card types that are identified automatically after insertion. Suitable editing functions are provided for every card type. Furthermore, there are low level functions for memory and processor cards for private applications.
