

ATVE-L

Exterior Programmable Voice Alert Siren

The ATVE-L is an advanced indoor voice programmable alert Siren designed using strong and durable polycarbonate material and includes an anti-tampering mechanism when being opened or removed from the wall. The SICB intelligent battery charging system prolongs the battery life. Battery autonomy 60 hours, alarm sound level 107dB, alarm time 3mins., 50 pre-recorded alert voice messages (fire, intrusion etc.), possibility to record 15sec. own messages to store and overwrite existing messages, only 5 messages can be set/activated to be used at any one time. Exterior LED flash with on/off setting. Multiple other external devices can be setup to trigger siren alerts (e.g. smoke alarm).

Key features :

-  Exterior alert siren for residential, commercial & industrial sites
-  Seamless installation by Bluetooth and management from any mobile device
-  Simple connection to any LoRaWAN™ network
-  Siren connects to main power supply, back-up battery not included (optional), works even in absence of internet

XTERMObILE APPLICATION AVAILABLE BY SUBSCRIPTION

XTERMObILE

XterMobile is a mobile application which allows you to manage all connected devices across the network and the Xter-Works cloud service. The app provides real-time notifications, logs, reports and follow up of all events and allows easy connection and installation of all devices by bluetooth (even without internet access).

Available on Android and iOS

APP KEY FEATURES

- Real-time and scheduled alerts
- Device monitoring & control
- Logical links between devices
- Geolocation by LoRaWAN™
- Battery level and temperature info
- Device location by mobile GPS
- Live event history reporting
- Manage multi-device groups
- Pro user account allows advanced device configuration
